

SANDIP FOUNDATION'S
SANDIP POLYTECHNIC, NASHIK
DEPARTMENT OF MECHANICAL ENGINEERING

Name of Project: Stand 360

Group Members:

1. Yatish Salve
2. Ketan Pitrubhakt

Description:

The stand 360 is differing from other any stand and it is stand attached to the rear axle of motorcycle. The stand reduces the human effort and save the time in parking and helps in service and maintenance. The stand 360 also having an integrated locking system in which we use the wire lock available in market. By the use of wire lock the stand 360 get safe from stolen but also it safe the motorcycle. The motorcycle gets double security i.e. handles lock provided by motorcycle and wire lock provided by our project.
