Summary Report of Online Webinar on User Interface / User Experience (UI/UX)

Sandip Foundation's, Sandip Polytechnic, Department of Computer Engineering organized webinar on User Interface/ User Experience (UI/UX) technology on date 12 May 2020.

The webinar was started with welcome & felicitation of Mr. Faizpur Rehman and Mr. Kartik Mishra by Computer department.

UX designers are primarily concerned with how the product feels. A given design problem has no single right answer. UX designers explore many different approaches to solving a specific user problem. The broad responsibility of a UX designer is to ensure that the product logically flows from one step to the next. One way that a UX designer might do this is by conducting in-person user tests to observe one's behaviour. By identifying verbal and non-verbal stumbling blocks, they refine and iterate to create the "best" user experience. An example project is creating a delightful on boarding flow for a new user.

To attend the same workshop total 190 students and professionals were present.

At the end of event students/professionals were appreciated. The workshop concluded with vote of thanks.
